

Refreshing Rules

1. Navigate to the course Control Panel.

2. Click on the **Early Warning System** link located under the **Assessment** header of the right side of the screen. The Early Warning System management screen will be displayed.

3. Click in the box next to the rule(s) that you wish to refresh.
4. Click on the **Refresh** link located in the gray Tool Bar at the top of the page. The selected rules will be run and any events that trigger the rule will create a warning or reinforcement message. The system will display a message letting you know that the rule was successfully setup, and will also sent the Instructor the following email.
